

Claremont and Oracle Cloud Applications

Guarantee Cloud success with Claremont

Are you considering moving your Enterprise Resource Planning (ERP) or Human Capital Management (HCM) applications to the next generation of Oracle Enterprise Applications?

More and more organisations are discovering the benefits of Oracle Cloud Applications. Oracle has combined their wealth of experience in business processes and Enterprise Applications with an excellent user experience to create a suite of market leading Cloud- based applications.

Business benefits

Deployment of Oracle Cloud Applications allows for a much lower cost of entry for customers. Instead of the traditional up-front capital investment, your business pays a monthly operating fee driven by the number of applications and pods (environments) required.

You may already have an ERP system and think that moving to the Cloud may be expensive, onerous and time-consuming. However, such a migration actually provides an opportunity to simplify your business processes and, with the costs of upgrades built-in to the Cloud Services monthly fee, your ongoing IT costs are also reduced.

“The new cloud-based system is outstanding and supports our IT Strategy. Claremont has set us up for future growth and better business. We are seeing the benefits already.”

Alan Dennison

Head of Systems Operations & Development, RiverStone

Claremont's team have implemented Oracle Cloud Applications at RiverStone, a global insurance company as well as the UK's first migration to Oracle Cloud Applications at Reading Borough Council. The Council estimates that this has delivered a saving of up to 30% per annum on their Information Technology spend.

Partnering with Claremont, the UK's leading independent Oracle services provider can ensure the success of your ongoing Cloud transformation.

With Claremont you will get:

Leading experts in Oracle Cloud ERP and HCM, Claremont will ensure your organisation gets the most value from Oracle Cloud Applications and offer the support you need for a successful journey to Oracle's Cloud.

Claremont offers expert advice, a proven methodology, and a rigorous but personal approach to implementation and delivery...

We provide:

- **Oracle Cloud Readiness Assessments**
We understand that deciding to implement Oracle Cloud Applications is a big decision. So, before you make the leap, let our experienced Oracle and business practitioners assess how ready your business is for Cloud, and offer expert, technical advice to prepare you for that journey.
- **Oracle Cloud Application Implementations**
Partner with Claremont to ensure the success of your Oracle Cloud implementation. Using our proven project management methodology, our team of experienced, expert consultants will manage the implementation project end-to- end, to

ensure its successful completion, on time and within budget. We know that IT implementation projects can be daunting. Working with Claremont you are choosing a safe pair of hands with an excellent track record.

Oracle Cloud Applications Support

Once you've implemented Oracle Cloud Applications you now need to make sure you're getting the most value from the product throughout its lifecycle. Claremont's managed service team act as an extension to your in-house resources. We value collaboration and open communication, and work with you to optimise your Oracle systems by using our expertise to provide proactive advice and support for patching new releases.

Cloud Integration

As IT systems become increasingly complex, the need for effective integration between different applications becomes more and more essential. Our integration specialists will offer advice, help to shape your integration strategy, and implement integration solutions that ensure that all your systems run together, most efficiently.

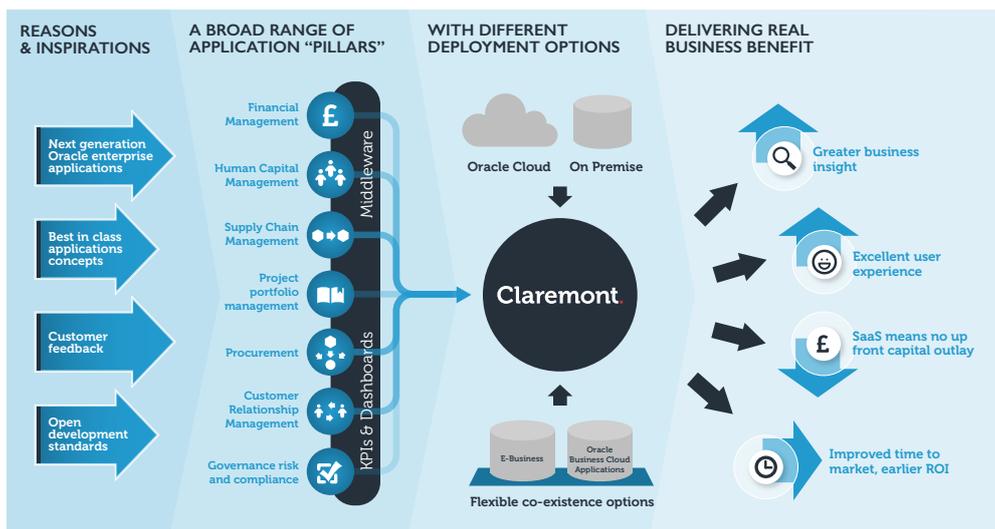

Claremont's best of breed approach to software ensures that your Cloud IT is always optimised for best performance.

Claremont is best placed to help your business because:

- It is a partner with a team of Oracle and business experts that don't just understand Oracle technology but it knows how to work with your business to optimise unique requirements.
- It is a partner who intimately understands business process, with extensive experience of implementations and upgrades of Oracle ERP/HCM.
- Our services are all delivered by fully certified, UK based, Oracle specialist consultants, and all projects are underpinned by Claremont's proven project management methodology.
- It has a heritage of providing industry-leading Oracle Managed Services for over ten years. It has the infrastructure, depth of expertise and ITIL best practice processes to provide a first class support service.
- It is uniquely experienced in Oracle Cloud Applications as well as Oracle E-Business Suite (Financials and Human Capital Management).
- Has a strong reputation for delivering exceptional and referenceable customer service.
- Helps customers realise the business benefits and supports the continual improvement of business process offered by Oracle Cloud Applications.
